- Net Heavy Equipment Inventory - Heavy equipment units that have been sold, leased, or rented less fleet transactions, dealer sales and subsequent sales. Heavy equipment means self-propelled, self-powered or pull-type equipment, including farm equipment or a diesel engine, which weighs at least 1,500 pounds and is intended to be used for agricultural, construction, industrial, maritime, mining or forestry uses. The term does not include a motor vehicle that is required to be titled under Transportation Code Chapter 501 or registered under Transportation Code Chapter 502.
Fleet Transactions - The sale of five or more items of heavy equipment from your inventory to the same person within one calendar year.
Dealer Sales - Sales of heavy equipment to dealers.
Subsequent Sales - A dealer-financed sale and that, at the time of sale, has dealer financing from your inventory in this same calendar year. The term does not include a rental or lease with an unexercised purchase option or without a purchase option.

SECTION 5: Market Value of Heavy Equipment Inventory

Provide the market value of your net heavy equipment inventory for the current tax year, as computed under Tax Code Section 23.1241. Market value on Jan. 1 is total annual sales (less fleet transactions, dealer sales, and subsequent sales) for the previous 12-month period corresponding to the prior tax year divided by 12. If you were not in business on Jan. 1 of the preceding year, report the number of months you were in business and the total number of sales for those months.

Total annual sales includes the sales price for each sale of heavy equipment inventory in a 12-month period PLUS lease and rental payment(s) received for each lease or rental in that 12-month period. This will be the same amount as the net heavy equipment inventory transaction amount (reported above) and divide by 12 to yield your market value for this tax year. If you were not in business on Jan. 1 of the preceding year, the chief appraiser will estimate your inventory's market value.
